

Atlas Copco WEDA 08S UL 115-1-60 Pump Unit #1217

#SN: 1870650

Atlas Copco WEDA 08S UL 115-1-60 Pump

WEDA pumps and accessories were designed for an extensive range of dewatering applications, across multiple industries. They provide the performance, reliability, and ease of use you need.

WEDA pumps feature a built-in starter and motor protection system along with optional automatic level control. Adjustable wear resistant rubber diffusors and hardened high chrome impellers ensure durability in tough environments.

WEDA pumps are made for durability. The unique sealing system and modular design make them one of the most flexible pumps on the market. Easy to use and maintain, WEDA pumps promise optimal performance. The WEDA ISP (Instant Service Pack) is the optimum maintenance solution and can be easily fitted at the job site. With the ability to handle flows up to 6,100 US GPM and a power rating up to 84 Hp, WEDA pumps are the perfect partner for your dewatering needs.
